<b>Description</b> Example: <ul style="list-style-type: none"><li>• The <a href="#">Paul Craig Roberts</a> writings page should include <a href="#">this page</a> in its listing, but does not.</li><li>• <a href="#">Thomas Sowell</a> should include <a href="#">this page</a> - and perhaps an additional link to the critique as well.</li></ul> It may be that the most time-efficient way of fixing this will be to write Filed Links v4.
