Description			
As displayed on the network stream, posts imported from Facebook do not offer a permalink to their imported version.			
If you save a post to a folder, then view the post there, it will show a permalink: http://hey.iseeamess.com/display/14219891120132568549328f552f9c ("view in context", bottom left) This link should be visible without having to save the post.
