toot.cat - Task #96

Task # 95 (Closed): Server Migration

Script writing

04/14/2018 05:24 PM - Charlotte Fields

Status:	New	**Start date:**	04/14/2018
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	6.00 hours

Description

Make a script to complete a migration with minimal user input.
steps:

- setup clean landingpad for the migration (get the base server setup) *Note, this doesn't have to be done but would be nice*
- database migration
- ~/live/public/system migration
- ~/live/.env.production migration

Things to consider:
tootcat (*Old server*) runs under /home/polymerwitch/live so either make the script adjustable or hard code it for this case.

History

#1 - 04/14/2018 05:31 PM - Charlotte Fields

things that may also be backed up

- The nginx config (under /etc/nginx/sites-available/default)
- The systemd config files (/etc/systemd/system/mastodon-*.service) which may contain your server tweaks and customizations
